8. Make sure **Mail** is switched to **On** and select the **Save** option.
   • Select the **Mail** icon from the iPhone home screen and let your new mailbox sync with your iPhone.
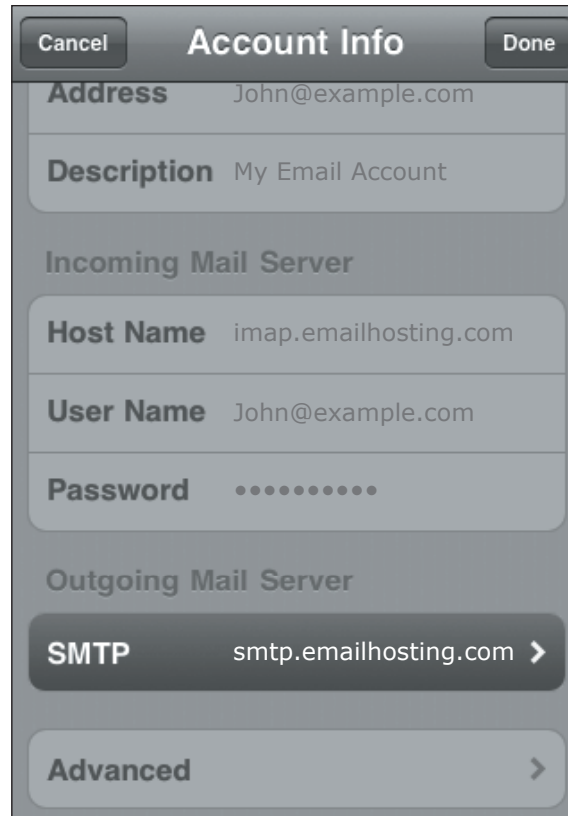

9. When sync is complete, from the home screen select **Settings** -> **Mail, Contacts, Calendars**.
   • Select your mailbox from the list.

Setting Up **Apple® iPhone**

EMAILHOSTING®

10. Click on **Account Info**.

11. On the **Account Info** page select **SMTP** under **Outgoing Mail Server**.

**12.** Select the **primary SMTP server**.

EMAILHOSTING®
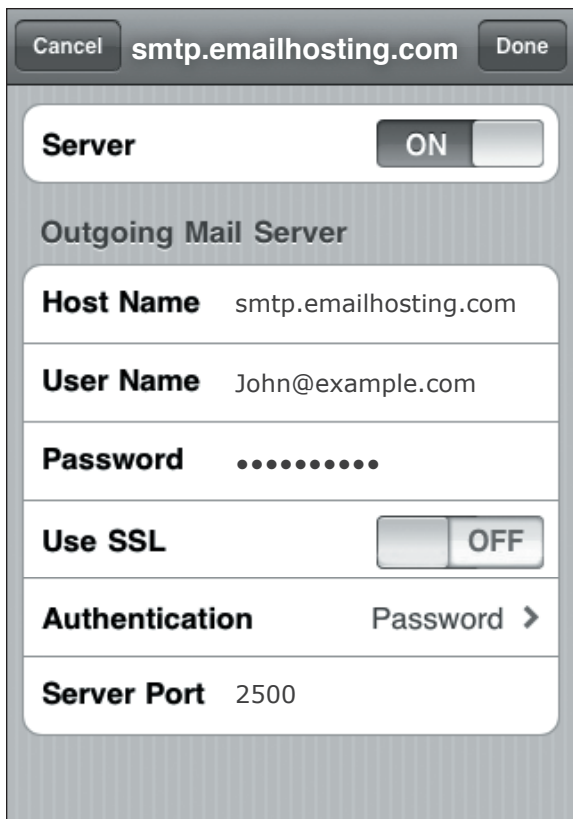

13. Ensure that all of your settings match the above screenshot.
- **SSL** should be off.
- **Authentication** should be set to **Password** and the **Server Port** is **2500**.
- Once complete select **Done**.
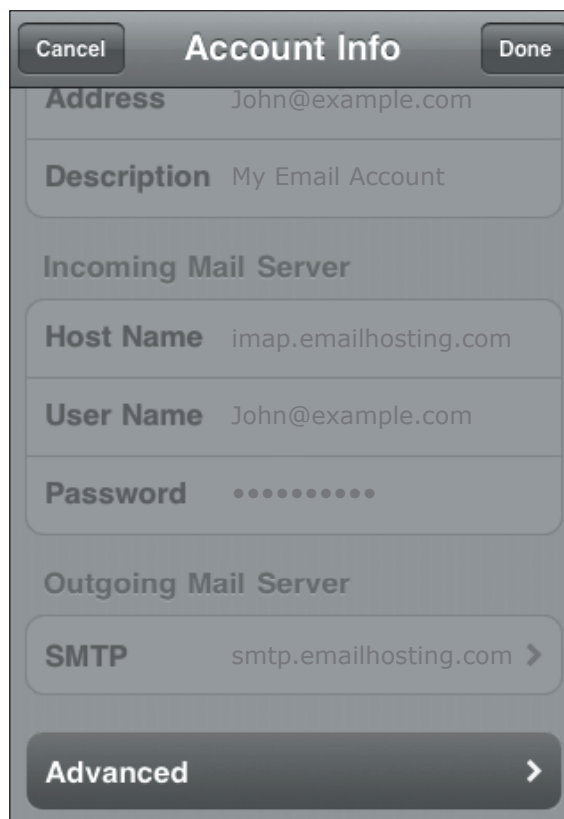

14. Back in the **Account Info** screen select **Advanced**.

15. One at a time select the **Drafts Mailbox**, **Sent Mailbox** and **Deleted Mailbox** and select the corresponding folders under "**On the server**". Note: This will map the iPhone so that it puts the corresponding emails into the right folder on your iPhone in addition to the server.
- Set **SSL** to **off**, **Authentication** to **Password** and the **Server Port** to **143** and select **Done**.
- Mail setup is now complete.
