

IMAP EMAIL ACCOUNT SETUP

1. Open the Android Applications menu and select the **Email** icon.

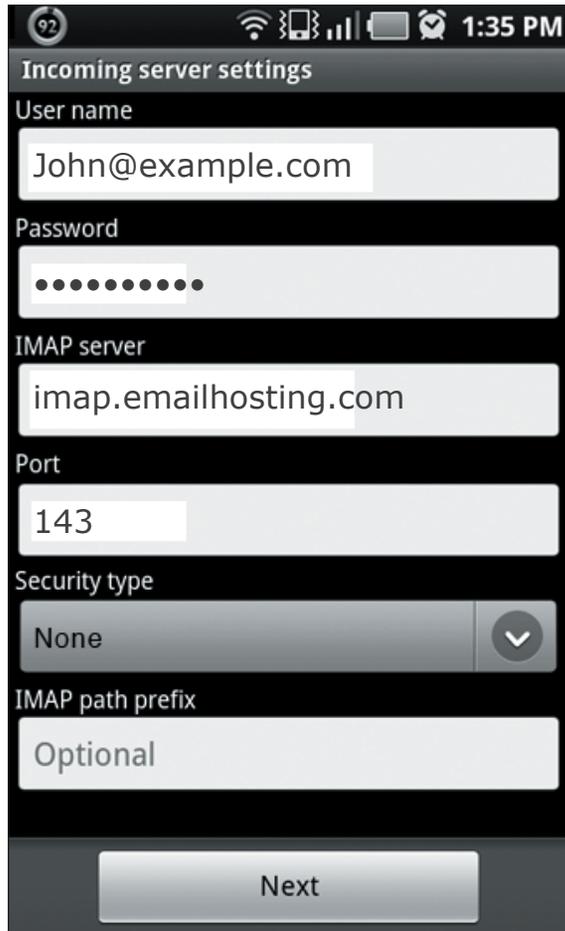

2. Select **Menu** -> select **Accounts** -> then **Add Account**.
 - Enter your account information:
Email address: your full email address
Password: your password
 - Select **Manual setup**.

3. Choose **IMAP account**.

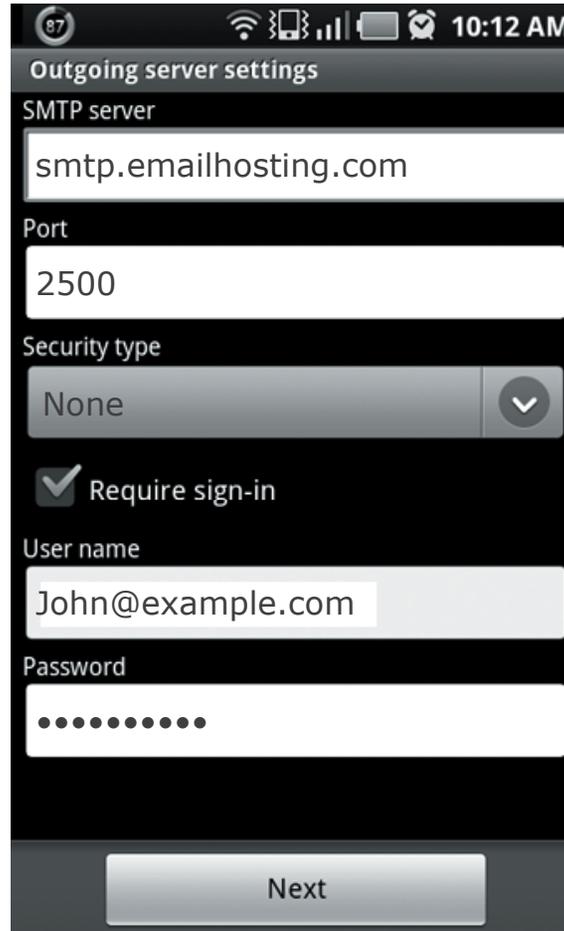

IMAP EMAIL ACCOUNT SETUP (cont.)

The screenshot shows the 'Incoming server settings' screen. The fields are filled with: User name: John@example.com, Password: [masked], IMAP server: imap.emailhosting.com, Port: 143, Security type: None, and IMAP path prefix: Optional. A 'Next' button is at the bottom.

4. Complete these **Incoming server settings**:

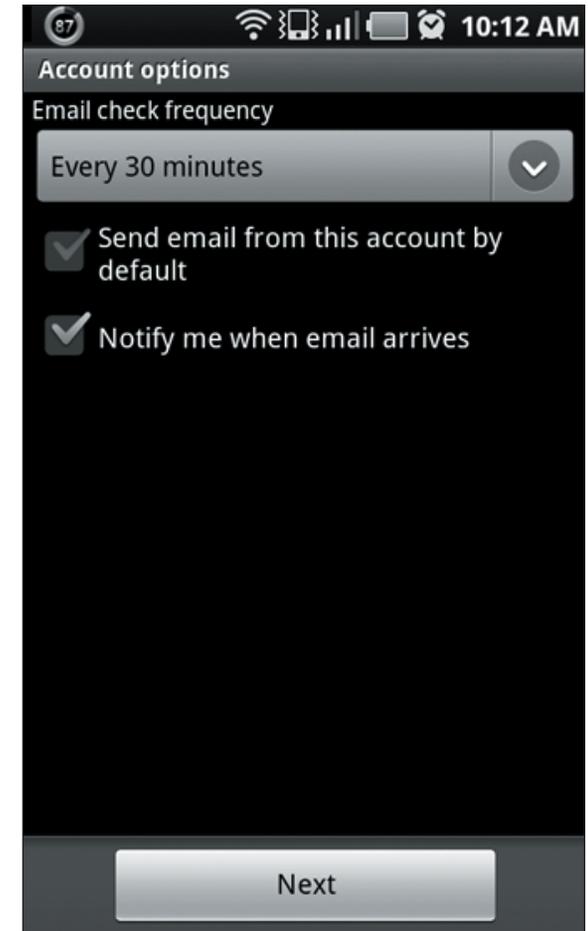

- **Username** is your full email address
- **Password** is your password
- **IMAP server** is imap.emailhosting.com
- **Port** for IMAP is **143**.
- **Security type** is **None**
- Select **Next**.

The screenshot shows the 'Outgoing server settings' screen. The fields are filled with: SMTP server: smtp.emailhosting.com, Port: 2500, Security type: None, Require sign-in: checked, User name: John@example.com, and Password: [masked]. A 'Next' button is at the bottom.

5. Enter your outgoing server settings.

- **SMTP** server name is smtp.emailhosting.com
- Outgoing **port** is **2500**
- **Security type** is **None**
- Select/check the **Require sign-in** box
- **Username** is your full email address
- **Password** is your password
- Select **Next**.

The screenshot shows the 'Account options' screen. The 'Email check frequency' is set to 'Every 30 minutes'. The 'Send email from this account by default' and 'Notify me when email arrives' options are checked. A 'Next' button is at the bottom.

6. Select how often you would to check for new email and select **Next**.

IMAP EMAIL ACCOUNT SETUP (cont.)

7. Type the name you would like to have appear on outgoing messages, then select **Done**. 🌐
